

Instructions for MccMnc files upload

This document describes how to update MccMnc table in my.testsms.com app.

Necessary files can be uploaded by role Client Management through page Settings. You can upload it either by drag and drop or by browsing on Upload files button. After all files are uploaded click Update MccMnc table.

For complete MccMnc table to be created, be sure to upload initially all necessary files. From uploaded files, app will create the main MccMnc table, for in app usage. Additionally, you can update any of the tables separately. Just drag and drop that table file and click Update MccMnc table.

You should separately upload files with Networks, NetworkPrefixes, NetworkParts and Countries data. Files should be csv format. Separator is semicolon (;).

Network:

- **Id** - Long
 - **Name** - String
 - **Operator** - String
 - **PrimaryMNC** - String (only digits)
 - **CountryId** - Long
-
